### THE GAZETTE.

TUESDAY EVENING, NOV'R. 19.

THE ENGLISH RAILWAYS are certainly managed with great regard to the safety of their passengers. There are fifteen thousand miles of rail in the United Kingdom, and on the entire length during the past year the number of fatal accidents, including those to the employees of the road, was but one in every three hundred and seventy-three thousand passengers carried. Three-fourths at least of these were caused by careless attempts to enter or leave the trains while in motion. For damages for personal injuries the companies have paid in all one million one hundred and twenty-five thousand dollars. The exhibit of some of the great railroads under a recent Parliamentary commission exceed even some of the American scandals. Of the capital of the London, Chatham and Dover railroad, recently bankrupt, fifty millions of dollars were paid for rolling stock, right of way, machine shops and general equipment, and thirty millions in "financiering, rigging the market, and making things generally pleasant."—Balt. Gazette.

PRESERVING VEGETABLES AND ROOTS.-It is often the case, with those who raise vegetables and roots for their own home purposes, that the cellar is made the receptacle for depositing the crop. In spite of every precaution that can be taken, a great loss is sustained by rotting, this superinducing a liability to sickness in the family from the putrifying mass of vegetable matter beneath them. The windows of the cellars are generally closed, and banked up with manure from the horse stable to keep the vegetables from freezing, but the quality of them will be better if kept as cold as possible without becoming actually frozen. Turnips and beets in particular are very liable to heat, and become spoiled if a large quantity is placed together, and potatoes, are often injured by being stored in large bins, instead of being put in barrels or spread thinly upon shelves in a dark cellar. When buried in the ground, small heaps, say twenty to thirty bushels in each, is best. More vegetables are doubtless injured by heat than cold in winter. - Balt. Amer.

REDUCTION IN PRICE.

We again present to the agricultural community our Fertilizers with renewed confidence, as equal, if not superior, to any manure offered for all crops, not excepting Peruvian Guano. Year by year their value has become more manifest, as demonstrated by largely increased sales, and we challenge any brand to show more satisfac-tory and uniform results. Confining our manu-facture to materials of highest standard, as proved by analysis, we claim like results in all time. On the Wheat crop the testimony is of unquestionable character. We respectfully call attention to our popular Guano, known as GENUINE PHOSPHO-PERUVIAN GUANO,

made of the highest standard of Peruvian Guano and Bone Phosphate of Lime, with Alkaline Salts of Potash, Soda, &c. BRANDED, AA

Containing 6 to 8 per cent Amminia. to 50 "Bone Phosp'e. Lime. Potash, Soda, &c. 40 to 50

Beautifully prepared and adapted to the Drill, in sacks of 11 to the ton, of 2000 pounds, and sold at \$60 per ton-former-

ly \$70 per ton.

The character of this Guano is so well known as to need but little further commendation from us. Used for many years, it has become a favorite with all consumers, and it only requires a trial to convince all of its value. The Ammonia and Bone Phosphate being in rational proportions, it can hardly fail to render satisfaction, improving the quality and increasing the crop it adds one other most important ess-ntial in the permanent improvement of the land-in this particular we question whether it has its equal. particular we question whether it has its equal. It acts wonderfully upon the grass crop, and to such an extent as to bring improverished lands up to a high state of fertility—equalling Bone Dust. Such is the testimony of many accomplished planters. We begthe closest investigation as to the integrity and manufacture of our tion as to the integrity and manufacture of our compounds, and earnestly invite all consumers to inspect our works, material used, and mode of
